

EZEKIEL AURELIUS LARA

MOBILE ENGINEERING DIRECTOR | iOS & CROSS-PLATFORM PRODUCTS | FINTECH

Boerne, Texas | ezeklara74@gmail.com | +1 (956) 800-2148 | ezekiellara.web.app | LinkedIn

EXECUTIVE PROFILE

Mobile engineering director and hands-on technical leader with 20+ years delivering mobile, web, financial technology, and enterprise customer experiences. Directs engineering for Fixi, a live iOS and Android roadside-assistance marketplace, and brings deep experience in mobile architecture, application modernization, accessibility, API integration, engineering standards, mentoring, and production delivery. Known for translating product strategy into reliable releases, guiding cross-functional execution, resolving high-impact issues, and building scalable, customer-centered platforms.

LEADERSHIP & TECHNICAL STRENGTHS

Mobile Leadership: Product engineering strategy, technical roadmaps, architecture direction, code reviews, mentoring, release governance, production readiness

Mobile Platforms: iOS, Swift, Flutter, Dart, iPhone/iPad delivery, cross-platform architecture, responsive applications, Git, CI/CD

Product Systems: Real-time location and ETA, marketplace workflows, payments, subscriptions, messaging, AI-assisted experiences, REST APIs, JSON

Enterprise Delivery: JavaScript, TypeScript, React, Java, HTML5, CSS3, cloud deployments, WCAG/ADA, ARIA, secure digital banking

PROFESSIONAL EXPERIENCE

Fixi / Omega One Developers | Director of Engineering | 2023-Present

- Direct engineering strategy and product delivery for Fixi, a 5.0-rated App Store and Google Play marketplace connecting stranded drivers with roadside service providers in real time.
- Guide mobile architecture and release execution across iOS and Android experiences involving service discovery, dispatch, precise location, live provider tracking, ETA updates, payments, subscriptions, and messaging.
- Led a ground-up application modernization focused on faster support, improved reliability, and a unified customer experience while expanding emergency and non-emergency service capabilities.
- Oversee architecture decisions, engineering standards, code and UI reviews, production troubleshooting, privacy-sensitive data flows, and mobile release quality.
- Partner with product and business leadership to convert roadside-service operations into scalable customer, provider, pricing, and payment workflows.
- Guide delivery of an AI-powered troubleshooting assistant that helps customers identify the correct roadside service before requesting assistance.

Webster Bank | Frontend Engineer / ADA Lead | Jan 2025-Present | Remote

- Serve as Lead Developer for a global accessibility initiative, establishing engineering standards for semantic structure, keyboard navigation, screen-reader behavior, and focus management.
- Guide architecture and delivery of enterprise digital-banking experiences, creating reusable components and patterns that improve scalability, maintainability, and release consistency.
- Partner with backend engineering, DevOps, QA, product, accessibility, and business teams to integrate APIs, resolve production issues, and streamline delivery.

First National Bank | Senior Web Solutions Developer | 2023-2024

- Delivered secure mobile and web banking workflows supporting loan origination, authentication, account verification, and customer onboarding.
- Coordinated accessible, responsive experiences across devices and cloud-backed services while balancing security, scalability, performance, and usability.

Temenos | Frontend / UI Developer | 2018-2023

- Delivered responsive financial customer journeys and reusable interface templates using JavaScript, JSON, Java, automated workflows, and enterprise API integrations.
- Contributed to Agile delivery, A/B testing, CI/CD, and cloud deployments while collaborating across frontend, backend, product, and QA teams.
