

Ezekiel Aurelius Lara

Senior Frontend Engineer | Temenos Journey Maestro | Fintech Accessibility

Boerne Texas, United States | ezeklara74@gmail.com | +1(956) 800-2148 (Back to back meetings; only voice-mails please)

<https://www.linkedin.com/in/sergio-h-nunez/>

Professional Summary

Engineering leader with 20+ years of experience delivering enterprise web, mobile, and financial technology solutions. Combines deep technical expertise with leadership across frontend engineering, digital banking platforms, accessibility, system integration, and application modernization. Experienced in guiding complex initiatives, solving high-impact production issues, improving engineering standards, and partnering across product, QA, accessibility, business, and technology teams. Strong background in Temenos Journey Maestro and Journey Manager, JavaScript/TypeScript, React, Java, REST APIs, mobile development, WCAG/ADA accessibility, and secure banking workflows. Known for translating complex technical challenges into practical solutions, reducing risk, protecting platform stability, and keeping teams focused on business and customer outcomes. Brings a hands-on leadership style grounded in architecture, code reviews, mentoring, technical interviewing, troubleshooting, and continuous improvement. Well suited for Engineering Manager, Technical Manager, Staff Engineering, and technology leadership roles requiring strong technical judgment, cross-functional collaboration, ownership, and the ability to guide teams through complex enterprise initiatives.

Professional Experience

Webster Bank — January 3rd 2025 - Present | Stamford, Connecticut - Remote

- Frontend - Engineer and maintain enterprise-grade web application forms using Temenos Journey Maestro, delivering secure, scalable, and WCAG-compliant user experiences for banking products.
- Architect and implement dynamic UI logic, validation rules, and reusable components using JavaScript, CSS, and Maestro scripting frameworks.
- Serve as Lead Developer for the ADA Accessibility Initiative, designing and deploying global accessibility solutions including: ARIA role corrections and semantic structure fixes • Keyboard navigation frameworks • Screen-reader optimization • Focus management systems
- Develop platform-level enhancements to improve form performance, maintainability, and cross-page consistency across multiple journeys.
- Collaborate with backend, DevOps, QA, and product teams to integrate APIs, ensure data integrity, and streamline deployment pipelines.
- Perform deep debugging and refactoring of legacy Maestro templates, eliminating technical debt and improving reliability.
- Implement scalable architecture patterns to prevent UI regressions across releases.
- Lead technical analysis for new features, translating business requirements into production-ready solutions.

Role Technical Environment: Temenos Journey Manager, Journey Maestro, JavaScript, HTML5, CSS3, ARIA/WCAG, REST integrations, Git, Agile/Scrum, enterprise banking platforms.

First National Bank — September 2023 to December 2024 | Remote

- Enhance banking automation workflows, such as loan origination, customer authentication, and account verification.
- Develop, enhance, and maintain FNB's online banking and mobile applications, ensuring high performance, security, and user experience.
- develop, and maintain the bank's web application, ensuring high performance, security, and scalability by leveraging Journey Maestro and Journey Manager's technology
- Optimize UI/UX for accessibility and responsiveness, ensuring smooth experiences across mobile, tablet, and desktop banking.
- Leverage cloud infrastructure (AWS, Azure, Google Cloud) for scalable and resilient digital banking services.
- Leverage cloud infrastructure (AWS, Azure, Google Cloud) for scalable and resilient digital banking services.

Role: Senior Web Solutions Developer - Temenos technologies

Omega One Developers — 2016 to Present | Remote

- Architect and develop cross-platform applications and full-stack solutions using Swift (iOS), Flutter/Dart, JavaScript frameworks, and modern backend services, delivering scalable, production-ready systems.
- Design and implement end-to-end software solutions including frontend interfaces, backend APIs, data models, and deployment workflows.
- Lead technical decision-making across projects, defining architecture patterns, coding standards, and scalability strategies.
- Conduct in-depth code, UI, and system architecture reviews to ensure performance optimization, maintainability, and enterprise-grade reliability.
- Apply WCAG and ADA accessibility standards across mobile and web applications, implementing semantic structures, keyboard navigation, screen-reader support, and inclusive design patterns.
- Collaborate with stakeholders to translate business requirements into technical specifications and deliver solutions aligned with product strategy and user needs.
- Design UI systems, visual assets, and interaction flows, ensuring consistency across platforms and devices.
- Maintain structured version control workflows (Git) including branching strategies, code reviews, merge conflict resolution, and release management.
- Monitor platform ecosystem changes (Apple SDKs, Flutter updates, browser standards) and proactively adapt architecture to remain compliant and future-ready.
- Mentor developers and facilitate technical knowledge sharing on best practices in mobile engineering, accessibility, architecture design, and modern development workflows.
- Advocate for optimal user experience, performance optimization, and platform compliance, including App Store review guidelines and cross-device usability standards.

Role: iOS Developer / Full-stack Engineer / UX/UI Developer

Temenos — November 2018 - February 2023 | Austin, Texas

- Front-end and UI development using JavaScript, JSON, and Java.
- Fixed defects and maintained form templates in Infinity Journey Maestro.
- Automation & Workflow Management – Implement automated workflows and process optimizations to improve efficiency and reduce friction.
- A/B Testing & Experimentation – Conduct testing on different journey touchpoints to assess performance and optimize experiences.
- Web Application Development – Design, develop, and maintain scalable, secure, and high-performance web applications.
- Integration with Journey Orchestration Tools – Work with platforms like Pega, Salesforce, or Adobe Journey Optimizer to enable seamless customer interactions.
- API Development & Integration – Develop and integrate APIs to facilitate communication between front-end and back-end services.
- Agile & DevOps Practices – Participate in Agile development cycles, CI/CD pipelines, and cloud-based deployments.

Role Technical Environment: • JavaScript • REST APIs • Git • CI/CD • Mobile Architecture • UI/UX Systems • Accessibility (WCAG/ADA) • Cross-Platform Development • Cloud Integrations

JASER Enterprises, LLC — October 2009 - 2016 | McAllen, Texas

- Led the design and production of high-volume daily publication layouts, translating editorial requirements into visually structured, user-focused page compositions.
- Directed end-to-end layout architecture using grid systems, typography hierarchies, and visual information flow principles to optimize readability and content accessibility.
- Collaborated cross-functionally with editors, journalists, and production teams to ensure accurate content integration, deadline compliance, and print-ready deliverables.
- Implemented standardized design frameworks and reusable layout templates to improve production efficiency and maintain brand consistency across issues.
- Applied visual hierarchy and cognitive scanning principles to guide reader attention and enhance information consumption — foundational skills now applied to modern UI/UX development.
- Managed multiple concurrent layout builds under strict deadlines while maintaining precision, quality control, and publication standards.
- Oversaw visual quality assurance, ensuring alignment with brand guidelines, typography standards, and publication specifications.
- Translated complex information into clear visual structures — an early foundation for data visualization and interface design systems.

Role: Art Director

Freedom Communications, LLC — Mcallen, Texas

La Frontera Daily Newspaper: June-2007 to October 2009

The Monitor Daily Newspaper: April-2006 to June-2007

- Designed and produced high-volume daily newspaper layouts, structuring complex editorial content into visually optimized, reader-focused compositions using grid systems, typographic hierarchy, and layout frameworks.
- Created print advertising assets for The Monitor, aligning brand messaging with visual strategy while ensuring compliance with publication specifications and production standards.
- Edited and maintained website pages for La Frontera, managing content updates, layout consistency, and visual presentation across digital formats.
- Applied principles of visual hierarchy, information architecture, and usability to improve content discoverability and reader engagement — skills directly transferable to modern UI/UX and frontend development.
- Collaborated with editorial, marketing, and production teams to integrate assets, validate content accuracy, and deliver time-sensitive releases under strict deadlines.
- Maintained visual quality assurance across print and digital outputs, enforcing brand guidelines, spacing systems, and typography standards.
- Optimized design workflows by leveraging reusable layout structures and standardized templates to increase production efficiency and reduce turnaround time.
- Translated business and editorial requirements into structured visual deliverables — an early foundation for requirements analysis and interface design engineering.

Role: Graphic Designer

Skills

IDEs Hybrid: Flutter/Dart, **Java:** Eclipse, IntelliJ, **React:** VSCode, **iOS:** Xcode

Technical Expertise

Programming Languages: Java, JavaScript, Groovy, PHP, C, C++, C#, Objective-C, Visual Basic, BASIC, Pascal, Ada 95, Assembly Language, Batch Scripting.

Additional languages to include if applicable: TypeScript, SQL/PL/SQL, Bash/Shell, PowerShell, Python, Kotlin.

Java Technologies and Frameworks: Spring Framework, Hibernate, GWT, JAXB, Maven, Gradle, Apache Ant, iText.

Web Technologies and Services: HTML, CSS, XML, JSON, AJAX, Angular, RESTful APIs, SOAP Web Services, SoapUI.

Databases: PostgreSQL, Oracle Database, MySQL, SQL, Relational Databases, Object Databases.

Platforms and Development: Docker, .NET, iOS Mobile Development, Mainframe Applications, IBM Products, Oracle Products, COM, DOS Utilities, Microprocessor Programming.

Architecture and Engineering: Microservices, Service-Oriented Architecture (SOA), Software Testing.

Core Banking

- Journey Manager
- Journey Manager
- Temenos T24

Experience

Java Groovy: Java-Groovy = 4+ years

Javascript: JavaScript = 5+ years

Maestro: Journey Maestro = 4+ years

Temenos: Quantum Infinity = 5+ years

Languages

- Spanish
- English

Certifications

- Infinity Journey Manager for Form Developers
- PWH Certificate C# Fundamentals Certified in Java
- Completed professional training on Temenos Journey Manager platform
- Journey manager Maestro expert
- Core Banking AA Technical
- Web Design Accessibility Certificate
- C# Fundamentals
- Certified in Java

Education

The University of Texas Rio Grande Valley — Bachelor's Degree, Computer Science | 2015 - 2017

South Texas College — Associate of Applied Science, Computer Science | 2012 - 2014

Memorial High School — High School | 1990 - 1994
